

Industrial Engineering Services:

- Engineering Industry Day to day Operation and Maintenance of Power plants, Sub-stations, power yards, switchboard operations, Gensets etc
- Complete plants taken care by our staff.
- Planned and unplanned Maintenance services.
- Preventive & Predictive Maintenance.
- Experienced Management available for Shutdown Support & analysis.
- Engineering and Technical support,
- Local and remote monitoring and diagnostics & Support 24x7
- Comprehensive training & output data
- Minutes with Safety Induction & programs
- Site documentation and procedure as per Rule3,
- Maintenance Management programs teams support
- Equipment service and repair
- Spare parts control system and emergency spares orders.
- Spare parts, Consumables and tools.
- Switchgear Maintenance & Services.
- Retrofitting and refurbishment of Distribution and Power Transformers.
- Power & Fuel Management.
- Complete computerized Reporting systems.

Electrical Engineering:

- 230/110/11 KV Outdoor Substation projects, operation & maintenance.
- Indoor switchyard Operation & maintenance.
- Panel operation.
- ATS and Emergency electrical Operation.
- Governor Inspection Service & Spare
- AVR Inspection Service & Spare
- LV/HV Alternator Service & Spare.
- Testing of Protection relay & Commissioning.
- Retrofit of electrical components / equipment.

Electronics and Instrumentation:

- Proximity sensors service & spare.
- RTDs, Thermocouple sensors & Controller
- Level Magnetic sensors.
- Trace Heating
- PLC & SCADA for Industry.
